Project: FSR 336 & FSR 343 2019 Road Improvement Project

5<sup>th</sup> or 6<sup>th</sup> Hydrologic Unit Code (HUC): 1018001005

Watershed name: Little Laramie River

Name: S. Kuchenbecker      Date: 8/21/2019      ☒ Digital    ☐ Film

**Comments:**

Road damage in wet area between Fourlog and Nelson Parks. Area seeing heavy braiding and deep rutting. Route needs water bars installed and unauthorized braids destroyed on either side of this damaged area. Damaged area should be ripped, seeded, and re-contoured to promote restoration. Main route can be improved by adding fill material. Area needs buck and rail or other barriers to force use only on main route. I recommend the area to have a seasonal closure to prevent further damage once improvements are made.
